MDRW100

DC/DC converters for railway application

1. Description

MDRW — ultra-compact isolated DC to DC converters for railway application. Despite its dimensions MDRW output power reaches up to 100 W. It has several features: wide range of operating temperatures (ambient −40...+85 °C), Remote On/Off, full range of protections: overcurrent, overtemperature, short circuit.

Internal configuration without optocouplers allows it to operate in high-temperatures conditions during all lifetime period. Polymer potting guarantees a high level of environmental protection as well as vibration, dust, humidity and salt mist. Every unit is tested for thermal resistance, including burn-in test in extreme power on/off mode.
